

CPR LEARNING MAT/ BAG

PRODUCT OVERVIEW

The CPR & AED Learning mat/ bag is a portable, foldable training solution designed to provide clear, step-by-step guidance for performing Cardiopulmonary Resuscitation (CPR) and using an Automated External Defibrillator (AED). After opening the zipper chains, the bag unfolds into a large training mat with life-size anatomical illustrations and easy-to-follow instructions. It is used as a mat during training sessions and, after use, can be folded back and closed like a bag. The kit is designed with zipper chains that allow convenient storage of the CPR manikin inside, making it easy to carry and organise.

SPECIFICATIONS

- ✓ **Material : Foam base with zipper**
- ✓ **Dimension: 87 X 60 cm**
